

EVIMONS® Caribonyl

Weight Loss from Inhibiting Fat Storage

How it works EVIMONS® Caribonyl inhibits the enzyme lipoprotein lipase (LPL), which is responsible for breaking down triglycerides in the blood. This prevents the triglycerides from being stored in fat cells, leading to a reduction in body fat.	Benefits • Reduces body fat • Improves insulin sensitivity • Lowers blood triglyceride levels • Supports overall metabolic health
Usage Take 1 capsule with a meal, 2-3 times per day. For more information, visit www.evimonsonutrition.com	EVIMONS® EVIMONS® Caribonyl is a natural, non-pharmaceutical weight loss supplement. It is safe and effective for long-term use.
