

5th Secondary Class

Science (Unit 10) - The Earth's Rotation

Introduction:
 1. The Earth rotates on its axis.
 2. This rotation causes day and night.

Objectives:
 1. To understand the Earth's rotation.
 2. To explain the causes of day and night.

Activity:
 1. Take a globe and rotate it around its axis.
 2. Observe the change in the illuminated area.

Conclusion:
 The Earth's rotation causes day and night.
